

Guidelines for National Register PowerPoint Presentations

General Guidelines:

- No more than five to seven (5-7) minutes long
- Must use images; number of images is not limited as long as presentation does not exceed time limit
- Can also use text to make additional points, however, text is not required for every image
- Make sure text is large enough to be easily read
- Each image should relate to what the speaker is saying at the time
- Can use one image to make more than one point

For all resources, include:

- Date of property's construction
- Location map (obtain from SHPO)
- Discussion of setting, if appropriate
- Level of significance
- Summary of reason for significance
- Mention if applicant plans to use one of the tax credit programs

For individual buildings, include:

- Style designation and brief discussion of stylistic features or building type (i.e., character defining features)
- Brief discussion of historic and/or architectural context
- Brief discussion of alterations; also provide reasons changes are not severe enough to prevent the property's acceptance to the Register
- Brief discussion of contributing and non-contributing elements, if important

For historic districts:

- Consult with National Register staff
